REACH-Regulation (1907/2006/EC)

Dear Sir or Madam

Thank you for your enquiry regarding the REACH regulation.

REACH is in force since June 1st, 2007. The pre-registration started at June 1st, 2008 and will end at November 30th, 2008.

With this letter we want to inform you about the current status of our products.

Our dispersions are preparations under REACH which contain polymers as the main component. Preparations as such are no subject to registration, only the substances therein. Polymers are exempted under the REACH regulation.

Regarding the raw materials used in our products we are a down stream user in terms of REACH and have no obligation to register. Therefore we are in contact with our suppliers to ensure the availability of our products.

We confirm that all REACH relevant raw materials contained in our products will be pre-registered by our suppliers or by us. We have already pre-registered critical raw materials. In addition we will pre-register all monomers before the end of the pre-registration deadline following the most recent suggestions of VCI, CEFIC and ECHA. We can therefore confirm that all our products will be available at least until December 2010.

We will forward information on your uses to our suppliers as soon as they made their decision regarding registration.

ALBERDINGK BOLEY

Alberdingk Boley GmbH

Currently Alberdingk Boley GmbH has no intention to withdraw products from the market due to REACH.

If you require further information please do not hesitate to contact us:

Phone: +49 2151 528-0
Fax: +49 2151 573643
mailto: reach@alberdingk-boley.de

We look forward to continuing success and cooperation.

Best regards

Alberdingk Boley GmbH

ppa. Dr. Gerhard Leinz
Laboratory Manager

i. A. Dr. Edith Herberth
