

**ORGANİK KİMYA**  
SANAYİ VE TİCARET ANONİM ŞİRKETİ

Dear Mr / Mrs,

The dispersion polymer and copolymer products that Organik Kimya is manufacturing are considered as “Polymer” under REACH. A polymer cannot be registered under the Regulation (EC) 1907/2006 but the individual substances composing the polymers shall be registered.

In this special case of polymers, the monomer substances or any other substance forming the polymer shall be registered as mentioned in Article 6(3) of the REACH Regulation.

We would like to inform you that Organik Kimya is in contact with all suppliers for an official answer and also will follow up the pre-registration & registration of the substances by the suppliers.

As well as that, “Organik Kimya Netherlands B.V.” is the “Only Representative”, in order to carry out all the issues of REACH on behalf of “Organik Kimya / Istanbul”.

Best Regards,

**Ozan Birkan**
